

weber®

**ORIGINAL
OUTDOOR
COVERED
COOKER**

weber

RECOGNIZED ORIGINATOR AND LEADER OF COVERED BARBECUE COOKING. GENERATIONS OF TRUE BARBECUERS HAVE ESTABLISHED THE TRADITION OF OUTDOOR COOKING ON CIRCULAR BARBECUE EQUIPMENT.

weber

PRINCIPLE

Uses two grills, the upper for foods, the lower for charcoal. Air circulates all through the charcoal to distribute heat evenly and seal in flavor and juices.

WHY FOODS COOK BETTER . . . IN A

weber

WEBER kettles cook with reflected heat to combine the economy of an oven with the zest of a barbecue.

With the exclusive WEBER cover in place, foods cook in their own juices—stay flavorful juicy and tender even when "well done." A unique damper system controls heat to suit you—brings out the matchless flavor of the finest cuts . . . even less expensive meats are transformed into gourmet delights.

weber ECONOMY

1. **QUALITY**—WEBER kettles are built to outlast ordinary barbecues. Heavy duty steel—porcelainized inside and out. Porcelain enamel never rusts, burns, fades or stains. It's acid resistant, corrosion resistant. It fights germs and odors and is easy to clean.
2. **BEAUTY**—Exciting and pleasing permanent colors.
3. **ECONOMY**—Saves charcoal, uses fewer briquettes to begin with. When finished cooking close all dampers and coals go out almost instantly and may be used again.
4. **PERFORMANCE**—Dampers regulate heat, cover eliminates flame scorching of meat and provides even distribution of heat.
5. **CONVENIENCE**—Entire meal may be prepared in the WEBER kettle. Requires no more attention than your kitchen oven. Easy to assemble.

DIRECT COOKING

Meats such as steaks, chops, hamburgers, flat food, etc. are cooked by direct heat and therefore are placed on the grill directly over the hot charcoals.

INDIRECT COOKING

Whole meats such as hams, fow, roasts, etc. are cooked by direct method. This process provides that the briquettes be placed on the sides of the charcoal grill and separated by an aluminum foil drip pan.
